Good Morning,

I hope you are having a wonderful Wednesday.

I wanted to provide an update regarding the site survey for camera #6. Our technician confirmed that the existing poles in the parking lot are not stable enough to attach our camera and panel. He also recommended moving to a new location due to it being so close to the parking spots.
I also had our deployment specialist review, and they advised if we would like to stay here at this spot that, for the best option of capture, we would need to core drill 40' from where the intersection starts. The Police Department would be responsible for getting the core drill done.

I would be happy to set up a call to discuss, or we can look at alternative locations. Please let me know how you would like to proceed.

I am also happy to share that camera #36 has been installed and is in service.

Please let me if you have any questions.

Best Regards,
Melissa

Hello,

Thank you so much for the update about #6.

Please let me know if there is anything I can do to assist.

Best Regards,

Melissa

Hello All,

I wanted to follow up here as well. I believe we are pending how you would like to proceed with Camera #6.

Also, I wanted to provide a quick update: Camera #36 has been site surveyed. We are pending 811 to come out and mark the underground utilities. Once we get confirmation that they have come out. We will be able to provide a tentative schedule for installation.

Please let me know if you have any questions.

Best Regards,

Melissa

Hello,

You will be responsible for getting the property owner's permission and core drill if it is necessary.

The cost for a flock pole installation is $650.

Would you like me to set up a call to review the options and review the details?

Best Regards,

Melissa

Good Morning Corporal Best,

I hope you are having a wonderful Monday.

I was advised by my deployment and installation team they would not advise installing on the existing sign pole. These tend to be too short and not stable enough for the camera and solar panel. They suggested a core drill and then installing a flock pole. This would ensure it is tall enough and stable. We would also need the signed private property permission from the property owner at 1220 W. Main. I have attached the form here.

Would you like me to set up sometime to review the options?

Best Regards,

Melissa

I contacted the resident who helps with the management of the property at 1220 W. Main. He said he was approached several years ago about putting an LPR pole on the property and at the time said “no problem”. He said we can contact him and he’ll have the property owners sign any paperwork you may require.

If viable, I was thinking the easiest, and least intrusive (though unconventional) would be to attach a flock pole to the existing parking lot “parking” pole (See pic 004). You wouldn’t need Cal-trans permit. Wouldn’t need to dig up asphalt.

Next option would be to place new pole in the asphalt somewhere on their property or on the building…but Cal-trans may have something to say about new poles near the curb.

Good Morning, Corporal Best,

I apologize for the delayed response.

At the time, CalTrans did not allow us to install our poles. We recently got feedback regarding additional requirements and paperwork that we will need for the CalTrans permitting process and approval. It has been escalated to the Flock leadership team to be handled as quickly as possible. Flock is working on the next steps and a solution. I will have an update by 1/5/2024, if not sooner.

An option to speed up the permitting process is to move to City, County, or Private property.

I understand you would like to get coverage on Main. Would you be available for a call zoom call after 1/2/2024 to look at alternatives to the CalTrans Traffic Signal?

Camera 036 NB Depot (south of Battles) is a part of Phase 2. I confirmed with my permitting team 036 NB Depot (south of Battles) is still going through the permitting process with the City. They are awaiting revised Site and Traffic control plans. They are estimated to be received and submitted by the end of next week.

Best Regards,

Melissa

Hi Santa Maria Team,

Commander Cohen and I were chatting yesterday regarding contract terms and we got to discussing Camera 6, which is the only camera we are waiting on from Phase 1. Due to where we are trying to place it (a CalTrans pole), we do want to revisit the possibility of relocating this. I have included @Melissa Barker-Solsbery in the email, so I do not want to speak too much about this because she is the subject matter expert but this is not something we have ever successfully accomplished and can take up to an additional 9-12 months. It truly may be in everyone's best interest to pick a new location for this.

I will let you all discuss this with Melissa to see what next steps are best for you all!

Thank you,
